# Front Page News

---

Integrating the latest in audio and visual technology results in a upbeat stage performance without being overbearing. "Front Page News" provides the best of all music worlds with horns, keyboards, percussion, guitar, bass, and a female vocalist (or two). They specialize in those hot classics and contemporary hits rich in harmony because everyone in the band lends vocal talents.

But it doesn't stop there. "Front Page News" is also able to offer a broad range of music, from light jazz, older classics, and even a little country which truly sets them apart. They've conquered it all, from corporate events, to community festivals to weddings, they are capable of a potpourri of sound - one reason why they have maintained one of the highest profiles in Wisconsin.
